TITLE : AUDIO EQUIPMENT FOR VEHICLE

ABSTRACT : PURPOSE: To select an optimum reproduction characteristic in response to the kind (genre) of voice information by providing a correction means having plural correction characteristics to a mixed signal outputted from a center speaker and a selection operation means selecting the correction characteristic in response to the operation of a crew of a vehicle.

CONSTITUTION: An optimum correction characteristic of a center speaker 9 is selected by a correction circuit 11 in response to the operating position of an operation section of a variable resistor 12 and genre of voice such as music source reproduced by the operation section of the variable resistor 12 for sound volume adjustment and a genre selector 3. Thus, the sound corrected with the optimum correction characteristic is reproduced from a left side speaker 7, a right side speaker 8 and a center speaker 9. Thus, even in the vehicle use audio equipment provided with the center speaker 9, the natural sound image is always obtained to the sound such as music information listened to the crew of the vehicle.
